

Amendments to the Abstract

Please **amend** the Abstract to read.

-- A video decoder {400} and method for low-complexity spatial scalable video are disclosed, the decoder for receiving compressed high-resolution scalable and standard-resolution bitstreams and providing high-resolution video, and including an I-picture detector {464} for receiving the compressed standard-resolution bitstream, a standard-resolution Intra decoder {466} coupled with the I-picture detector for decoding I-pictures, a high-resolution video decoder {482} for receiving the compressed high-resolution scalable bitstream, and a selector {486} coupled with the standard-resolution Intra video decoder and the high-resolution video decoder for selecting between the outputs from the standard-resolution Intra video decoder and the high-resolution video decoder to provide the high-resolution video sequence. --
